Welcome to term three in Red Class. It is hard to believe that 2 terms have already finished. This term is set to be another exciting term with lots of interesting learning activities occurring throughout it.

In English this term we are learning about poetry. Over the term we will be collecting a range of poems and analysing them to understand why they were written and the structure of them. At the end of the term students will be using the theme from a poem to be the basis for a narrative that they will write.

In Maths this term we have already done some work around angles and the different types of angles. We are now beginning to look at the 3D shapes and the properties of them. As we go through the term we will investigate equivalence, fractions and we will take another look at decimals because they are always a little tricky to get the hang of.

In Science we have already started looking at light and how it is a form of energy. We will be doing some experiments this term investigating how light travels and whether light can be altered in any way. For assessment students will be asked to bring a shoe box in and they will create a maze within the shoe box and then be asked to transmit light from one side of the shoe box, through the maze and out a hole at the other end by using only mirrors. It should be a fun experiment for all students.

This term in Art students will be doing drama. We will be playing some drama-based games to help students develop confidence in speaking in front of an audience and also to help with their improvising skills. At the end of the term students will work in groups to perform a play.

In SOSE we will be looking at the Olympics as they are not that far away! Students will take a look at the history of the Olympics and where they started and why. They will then follow the timeline to see how they have changed from the beginning and what the Olympics mean today. Students will look at what types of sports people compete in, the rules of the sports, what you get if you win and what it means for your country.

This term we will continue to work on our reading and comprehension. It is really important that students are doing reading at home but also to be focusing on comprehending texts. Comprehension and multiplication will be focused on a lot this term. Students are also to be reminded that homework is something they need to be doing every week and returned every Friday or earlier if possible.

If you have any questions of concerns please feel free to contact me. I hope you have a wonderful term.
