WELCOME TO YEAR 6

Orange Class have blitzed the first week of our new semester and are eager to learn lots of new and exciting things! Here’s what we are up to this semester:

English

We are heading to the future in our first task! Year 6 will be constructing a text that establishes time and place for the reader. And in the later part of the term we will be discussing and comparing two novels by the same author.

For our final term of Year 6 we will be having fun transforming informative texts into literary texts for younger readers to enjoy.

Maths

It’s all hands on deck as we engage in a number of different mathematical concepts for this coming semester. Year 6 will be covering:

* Number and place value
* Location and transformation
* Fractions and decimals
* Chance
* Data representation and interpretation

Science

Science this semester is all about the Earth.

First we will explore how Earth’s surface changes with the occurrence of earthquakes. Before we investigate the environmental conditions that affect the growth and survival of living things.

HASS

How do places, people and cultures differ across the world? And how do Australia’s global connections influence my role as a global citizen?

Health

Student will examine the available alternatives to drink options here at our tuckshop. This is before we begin exploring the issues and challenges with transitioning to Year 7.

The Arts

We will dance our way into Term 4 with Footsteps happening in Term 3. Whilst in Term 4 we will explore visual arts and using different materials to communicate ideas.
