Welcome to Red Class!

Welcome to term two. A lot of things are happening this term including cross country, NAPLAN and creating items for our show display. I look forward to the wonderful things we will achieve this term.

**English:** This term students are creating a digital multimodal short story that demonstrates how two characters behave when faced with an ethical dilemma. Students will choose an ethical dilemma and then discuss why it is an ethical dilemma. They will create a story to show the ethical dilemma and use characters to portray their story. Students will use cameras to capture different scenes for their story and add them to PowerPoint. They will finalise their story by adding voices and sound effects.

**Geography:** This term we will be looking at different countries around the world. We will be looking at their location in relation to Australia and discussing similarities and differences between countries and comparing their human and environmental characteristics.

**Mathematics:** We will be focusing a lot on decimals and the connection between decimals and fractions. We will also spend a lot of time looking at angles, shapes and symmetry. Students will be doing a number of inquiries this term to help them demonstrate their understanding of mathematical concepts.

**Science:** This term we are looking at our solar system. We will be comparing features of planets and celestial bodies. We will also be taking a look at some of the inventions that were made for space but have made their way into everyday life and how our lives would be different if we didn’t study the universe.
